

## **PE-Goat Anti-Human IgG (H+L)**

### **Product Information**

Catalog No.:	FNSA-0181
Size:	100µg/500µg
Form:	liquid
Purification:	The antibody was affinity isolated.
Fluorophore:	PE, Excitation: 488-561 nm, Emission: 578 nm
Storage:	PBS with 0.1% sodium azide, 1%BSA, pH 7.3, 2-8°C for 12 months (Avoid repeated freeze / thaw cycles.)

### **Product Description**

Anti-Human IgG (H+L) antiserum is produced in goat using purified human IgG as the immunogen. Affinity isolated antibody is obtained from goat anti-human IgG antiserum by immunospecific purification which removes essentially all goat serum proteins, including immunoglobulins, which do not specifically bind to human IgG. When tested by Ouchterlony double diffusion (ODD) the product shows no interspecies cross reaction with mouse or rat IgG.

### **Application**

Tested Application: IF, Flow cyt  
Suggested dilution: 1 µg/test

Human peripheral blood lymphocytes are stained with Anti-Human CD20 Antibody and then stained with PE-Goat Anti-Human IgG (H+L).
