

# **HLA-A** antibody

### **Product Information**

Catalog No.: FNab03896

Size: 100μg Form: liquid

Purification: Protein A+G purification

Purity: ≥95% as determined by SDS-PAGE

Host: Mouse

Clonality: monoclonal

Clone ID: 0D3
IsoType: IgG2a

Storage: PBS with 0.02% sodium azide and 50% glycerol pH 7.3, -20°C for 12

months(Avoid repeated freeze / thaw cycles.)

## **Background**

HLA-A belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodimer consisting of a heavy chain and a light chain (beta-2 microglobulin). The heavy chain is anchored in the membrane. Class I molecules play a central role in the immune system by presenting peptides derived from the endoplasmic reticulum lumen. They are expressed in nearly all cells. The heavy chain is approximately 45 kDa and its gene contains 8 exons. Exon 1 encodes the leader peptide, exons 2 and 3 encode the alpha1 and alpha2 domains, which both bind the peptide, exon 4 encodes the alpha3 domain, exon 5 encodes the transmembrane region, and exons 6 and 7 encode the cytoplasmic tail. Polymorphisms within exon 2 and exon 3 are responsible for the peptide binding specificity of each class one molecule. Typing for these polymorphisms is routinely done for bone marrow and kidney transplantation. Hundreds of HLA-A alleles have been described.

### Immunogen information

Immunogen: major histocompatibility complex, class I, A

Synonyms: HLA class I histocompatibility antigen, A alpha chain|Human leukocyte

antigen A (HLA-A)|HLA-A|HLAA

Observed MW: 44 kDa

Uniprot ID: P04439/P30443

## **Application**

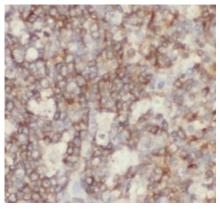

Reactivity: Human

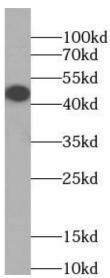

Tested Application: ELISA, WB, IHC, FC

Recommended dilution: WB: 1:1000-1:8000; IHC: 1:20-1:200
