

SGMS1 antibody

Product Information

Catalog No.:	FNab07811
Size:	100µg
Form:	liquid
Purification:	Immunogen affinity purified
Purity:	\geq 95% as determined by SDS-PAGE
Host:	Rabbit
Clonality:	polyclonal
Clone ID:	None
IsoType:	IgG
Storage:	PBS with 0.02% sodium azide and 50% glycerol pH 7.3, -20°C for 12 months(Avoid repeated freeze / thaw cycles.)

Background

Sphingomyelin synthases synthesize the sphingolipid, sphingomyelin, through transfer of the phosphatidyl head group, phosphatidylcholine, on to the primary hydroxyl of ceramide. The reaction is bidirectional depending on the respective levels of the sphingolipid and ceramide. Golgi apparatus SMS1 directly and specifically recognizes the choline head group on the substrate, requiring two fatty chains on the choline-P donor molecule in order to be recognized efficiently as a substrate. Major form in macrophages. Required for cell growth in certain cell types such as HeLa cells. Suppresses BAX-mediated apoptosis and also prevents cell death in response to stimuli such as hydrogen peroxide, osmotic stress, elevated temperature and exogenously supplied sphingolipids. May protect against cell death by reversing the stress-inducible increase in levels of proapoptotic ceramide.

Immunogen information

Immunogen:	sphingomyelin synthase 1
Synonyms:	Phosphatidylcholine:ceramide cholinephosphotransferase 1 Medulla oblongata-derived protein (Protein Mob) Sphingomyelin synthase 1 Transmembrane protein 23 SGMS1 MOB SMS1 TMEM23
Observed MW:	50 kDa
Uniprot ID :	Q86VZ5

Application

Reactivity:Human, Mouse, RatTested Application:ELISA, WB, IHCRecommended dilution:WB: 1:500-1:2000; IHC: 1:20-1:200Image:

Immunohistochemistry of paraffin-embedded human liver using FNab07811(SGMS1 antibody) at dilution of 1:50

human heart tissue were subjected to SDS PAGE followed by western blot with FNab07811(SGMS1 antibody) at dilution of 1:300
